

Bootstrap & ES Project

Project Ideas:

Weather Dashboard

- **API:** [OpenWeatherMap API](#) OR [Weather Api](#)
 - **Description:** Build a responsive dashboard where users can search a city and get current weather, temperature, humidity, and a 5-day forecast.
 - **Ex) Bootstrap Features:** Cards, alerts, responsive grid.
-

2. Crypto Tracker

- **API:** [CoinGecko](#) or [CoinMarketCap](#) API
 - **Description:** Show live cryptocurrency prices, percentage changes, and charts. Add search/filter by coin.
 - **Ex) Bootstrap Features:** Navbar, tables, badges for price changes.
-

3. Recipe Finder

- **API:** [Spoonacular](#) or [TheMealDB](#)
 - **Description:** Users enter ingredients, and the app shows possible recipes with images and instructions.
 - **Ex) Bootstrap Features:** Accordion for recipe steps, modals for details.
-

4. Movie Search App

- **API:** [OMDB](#) or [TMDb](#)
- **Description:** Search for movies by title and get info like rating, plot, and poster.
- **Ex) Bootstrap Features:** Cards for movie listings, modals for details.

Bootstrap & ES Project

5. News Aggregator

- **API:** [NewsAPI](#)
 - **Description:** Pull and display the latest news articles from different categories and sources.
 - **Ex) Bootstrap Features:** Tabs for categories, list groups, card decks.
-

6. GitHub Profile Viewer (Bouns)

- **API:** [GitHub API](#)
 - **Description:** Enter a GitHub username to view profile info, repositories, followers, etc.
 - **Ex) Bootstrap Features:** Grid system for layout, progress bars for stats.
-

7. Currency Converter

- **API:** [ExchangeRate](#) API or [API Layer](#)
 - **Description:** Input an amount and select two currencies to get the converted value in real-time.
 - **Ex) Bootstrap Features:** Input groups, dropdowns, alerts for errors.
-

8. Space Explorer

- **API:** [NASA API](#) or [Space API](#)
- **Description:** Show astronomy pictures of the day, Mars rover photos, or near-earth objects data.
- **Ex) Bootstrap Features:** Carousel for images, cards, dark mode toggle.

Bootstrap & ES Project

9. Book Finder

- **API:** [Google Books API](#)
 - **Description:** Search for books and get details like author, description, and cover image.
 - **EX) Bootstrap Features:** Pagination, card layout, badges for book genres.
-

10. E-commerce Storefront

- **API:** [Fake Store API](#) or [DummyJSON](#)
- **Description:** Browse products, add to cart, view details, checkout mock
- **Ex) Bootstrap Use:** Product cards, modals, navbar, responsive grid
